

Online Ordering Organization

We Will Take Control of Your 3rd Party Online Ordering Sites

The online ordering people only program part of your menu and even that will not be correct.

HCS knows your menu and your operation already. Don't spend your valuable time trying to "fix" the online menus.

HCS can "take over" your online menus and:

- Raise the prices to compensate for the fees
- Ensure the entire menu is available for your customers
- Fix the modifiers to charge appropriately
- Maintain the menu and update for specials and new menu items.
- Did you know the online ordering platforms have features that lower your menu prices and move your items around without you knowing about it??
