

## About: Hospitality Computer Solutions

Hospitality Computer Solutions was created in 1989 to assist restaurant owners in obtaining their cash management systems.

**After several years of** assisting other point of sale software dealers, we became the Lead Dealer for RCS-100 (VersiTouch) in 1993. This offered our customers the convenience of one shop for not only their point-of-sale system, but also as the installer, programmer, trainer, support, and service provider.

**Now, Hospitality Computer Solutions has** works with all restaurants and multi-unit operations. We provide a level of personalized service not found with other systems. As you upgrade your operation, we will make the point-of-sale system as efficient as it can be.

**One of the largest benefits** to our customers is having extremely experienced business personnel **(not computer "nerds")** with restaurant and computer knowledge. Hospitality Computer Solutions provides stellar service and support with each system.
